

Data-Driven Decision Making

From data to decisions with confidence and clarity.

Programme level	Graduate, Postgraduate	Duration	8 weeks
Credits	2	Delivery	Classroom, Online, Hybrid, Executive Workshop
Subject area	Data-Driven Decision Making	Updated	2026-07-21

Course overview

A managerial course on using data, evidence and structured judgement to improve decisions while recognising uncertainty, bias and organisational constraints.

Intended audience: Graduate and postgraduate students, managers and technical leaders responsible for evidence-based choices.

Prerequisites: No specialist technical prerequisite.

Learning outcomes

- Distinguish information, evidence and managerial judgement.
- Define decision criteria and relevant measures.
- Interpret uncertainty and common analytical limitations.
- Challenge assumptions and reduce decision bias.
- Present an evidence-based recommendation to stakeholders.

Module structure

01	Decision quality and evidence Decision frames, criteria and information value.
02	Interpreting data and uncertainty Variation, confidence and practical significance.
03	Bias, incentives and organisational context Judgement traps and stakeholder dynamics.
04	Scenario and trade-off analysis Alternatives, sensitivity and robust choices.
05	Communicating decisions Recommendation structure, visual evidence and action.

Assessment pattern

Assessment component	Weight
Decision memo	30%
Evidence critique	30%
Final decision presentation	40%

Delivery note

The module sequence, class activities and assessment details may be adapted for programme schedules, cohort experience and institutional requirements. The course remains focused on practical application, structured judgement and professional communication.
